2019 Countywide Institute Day
March 1st, 2019

Agriculture in YOUR Classroom

**Implement agriculture
into your classroom
without beginning a
new unit!**

This workshop is designed to engage K-12 educators, aides, administrators, and more with agriculture activities and lessons that can be adapted to many content areas and disciplines. Presenters will focus on providing hands-on activities that connect many different concepts such as animals, plants, foods, technology, and careers. Attendees will leave with a new perspective of how to incorporate agriculture into their current curriculum, while also sparking students' interest in the food, fiber, and fuel industry. This FREE workshop includes materials and resources.

Hosted by: The DuPage County Farm Bureau Ag in the Classroom Program

Event Location: College of DuPage
